VetScite News Update (August 6, 2013)

The latest News Update at Veterinary Sciences Tomorrow is online and may be reached from the Home Page (<http://www.vetscite.org>) using the News link in the navigation bar at the top of the page.

As usual these news items have been selected from a range of biomedical and animal health sources with the express purpose that they should be of interest to researchers working in the veterinary and animal science environments.

A selection of the headlines is listed below and links are provided to the relevant web pages:

Many animal studies of neurological disease appear to overstate the significance of their results
<http://www.vetscite.org/publish/items/008105/index.html>

Birds and humans have similar brain wiring
<http://www.vetscite.org/publish/items/008110/index.html>

Dog hair can be used to diagnose hormonal problems in dogs
<http://www.vetscite.org/publish/items/008113/index.html>

Mutation in dogs offers clues for neural tube defects in humans
<http://www.vetscite.org/publish/items/008116/index.html>
